INTERNSHIP

DeployH.ai Technologies Pvt.Ltd ↗   **SEPT 2024 – PRESENT**
<u>*Full Stack Intern*</u>   *Hyderabad, India*

- Documented and tested APIs for Qualys, ZAP, and Veracode using Postman.
- Built various UIs and dashboards, including Vulnerability Management, HR Analytics, and Student Counseling.
- Integrated Firebase analytics into an Admin Panel UI and developed a social media share feature in Next.js.
- Collected, organized, and stored educational data in Firebase, enabling integration with Student AI project.
- **Technologies Used: React.js, Next.js, Postman, Firebase, JavaScript.**

Payas Technologies Pvt.Ltd ↗   **APR 2023 – OCT 2023**
<u>*Software Developer Intern*</u>   *Pune, India*

- An innovative healthcare platform enabling users to effortlessly book appointments, while also facilitating doctor applications for a comprehensive medical ecosystem.
- Implemented a dynamic admin dashboard, allowing effective oversight of user registrations, appointment approvals, and data management for seamless platform operation.
- Ensured data protection by employing access controls, while also enabling timely notifications for users and doctors, enhancing communication and appointment tracking.
- **Technologies Used: MERN, CSS**

PROJECTS

HealthBooker ↗ | <u>MERN, CSS</u>   **OCT 2023**

- Introduced an intuitive user interface, making it effortless for users to navigate through various features, including user registration, doctor search, profile management, and appointment booking, thereby enhancing user satisfaction and retention.
- Developed a dynamic profile update functionality, enabling users to personalize their profiles with relevant information such as medical history, preferences, and contact details, fostering a sense of ownership and trust within the platform.
- Implemented a versatile contact section, facilitating user queries and feedback through multiple channels including email, chat support, and phone assistance, resulting in improved user engagement and customer support responsiveness.

<u>Job Portal</u> ↗ | ReactJS, Tailwind-CSS   **FEB 2024**

- Developed a feature-rich MERN stack Job Portal focusing on frontend technologies, employing React.js for an enhanced user interface.
- Enabled users to seamlessly browse, add, edit, and delete job listings through a user-friendly and intuitive design.
- Enhanced user experience through advanced search and filtering options, contributing to an improved overall interface.
